INSTALLATION

① ② ③ ④

1. Lift the bumper from the gap located on the bottom of the case.
2. Gently separate the bumper from the case.
3. Slide the Galaxy onto the battery case. Make sure to snugly connect the phone to the Micro USB connecter.
4. Snap the bumper onto the back case and make sure there are no gaps between the bumper and back casing.
5. To uninstall the case, simply reverse the steps of 1-4.

How to charge the Galaxy S6

1. Place the Galaxy S6 into the ZVOLTZ case.
2. Press and hold the power button for 2 seconds, the case will be begin to charge.
3. When charging starts, the Galaxy will vibrate or give a beep sound.
4. The battery icon on the upper right corner of the screen will feature a lightning bolt to indicate that charging is in progress.

HOW TO CHARGE

How to charge the ZVOLTZ Battery Case

⊛ ⊛ ⊛ ⊛ 75–100%
⊛ ⊛ ⊛ ○ 50–75%
⊛ ⊛ ○ ○ 25–50%
⊛ ○ ○ ○ 1–25%
1. Connect the case to any USB charging port via the provided USB cable, and the case will start charging. The LED indicator will flash when charging, and it will become steady when fully charged.
2. If you are going to charge the case and Galaxy together, make sure to install the case on the Galaxy before connecting them to a power source. The external power source will fully charge the Galaxy first, then recharge the case.

Quick Charge Capable

The battery case will work with Qualcomm Quick Charge 2.0, however it will require the use of a Quick Charge 2.0 charger. The battery case by itself will only charge the phone at 5V/2.1A max.

CHARGING & CONTROLS

LED Indicator

Press and hold the power button to turn the case ON. Once powered ON the LED indicator located on the back of the case will display remaining power levels.
To check remaining power levels while the case is equipped, simply press the button and the LED indicator will show current power levels.
The LED Indicator will automatically shut off after 10 seconds. Power levels and their corresponding % are shown below.
